Boxes can be made to fit your contents. The only limitation is paper size. Decide on the size of the central face on the Punch Board chart. Add the sides based on this chart. The Central Face size may vary a bit. I've recorded these Central Face sizes based on the "Card Size 2 x 3 1/2" which requires a paper size of 5" x 5". The largest box on this list uses the full 12" x 12" card stock, 5" x 5" + 7" each way, resulting in a box that is 2 3/8" x 3 5/8" x 5" tall.

- If the score line goes beyond the end of the punch board, just fold on the score line you were able to make. This will extend the line to the end.
- If the measurements do not go far enough, make a tiny tick mark with a pencil and move that mark to add the required measurement.
- Some tabs need to be trimmed so they fit inside the box.
