Notes:

You will use the Stamparatus to create a symmetrical design on the Basic White square piece of card stock. As you work, you will be making a master of your design on the grid paper. This helps you with placement for the various stamps. It will also give you a pattern if you decide to repeat your design. Your first stamp will be near the corners, then you will work your way toward the center.

This technique works with many stamps, especially stamp sets with multiple small images that do not have a strong direction, something that would look funny upside-down. But Sweet Symmetry is especially great for it, as most of the images are symmetrical and can be lined up perfectly.

As you stamp with the Stamparatus, you may get ink on the plate. This can easily be transferred as smudges to your card. This is especially true if the ink touches the magnets. Have the Simply Shammy or a wet wipe of some kind available to wipe off any stray ink before stamping.

1. Score the Misty Moonlight card stock at 5 1/2". Fold and crease for the card base.
2. Adhere the Just Jade layer to the card front.
3. Stamp your greeting in Misty Moonlight ink about 2" from the top of the 4" x 5 1/4" Basic White layer. Stamp the large five-petal flower in Flirty Flamingo ink on the bottom of this layer. Adhere to the inside of the card. You may want to stamp this flower on the flap of the envelope as well.
4. Mark an X on the Small Grid Paper. (7" x 7") to (1" x 1") and (7" x 1") to (1" x 7") Place the 3 3/4" x 3 3/4" Whisper White piece so all four corners of the card stock are on the drawn lines. Mark a dot in each corner.
5. With the grid paper on the Stamparatus, place a single leaf on the diagonal line with the point near one corner where you marked a dot. Pick up the leaf stamp with the Stamparatus plate. Ink with Just Jade ink and stamp the grid paper. Position the card stock on the marks. Ink again and stamp the card stock. Rotate 90° and stamp again. Repeat for all four corners.
6. Position the small double leaves just at the base of the single leaf. Stamp with Just Jade ink on the grid paper, then stamp all four corners of the card stock.
7. Move the double leaves stamp toward the center and just barely touching the previous leaves. Stamp with Just Jade on the grid paper and all four directions of the card stock.
8. Place the small three-petal flower right at the base of the second double leaf stamp and aligned with the diagonal line. Stamp with Bumblebee ink on the grid paper and all four directions of the card stock.
9. Place the large three-petal flower with the center petal on the vertical line (at 4") and about even with the first stamped leaf. Pick up the stamp and

stamp in Flirty Flamingo ink on the grid paper and all four directions of the card stock.

10. Depending on your placement, you may have room for the full circle stamp that is 1 1/8". If so, position this stamp right in the center of the drawn X. Ink with Flirty Flamingo ink and stamp the grid paper and the card stock. If you don't have room for that flower, move the three-petal flower you used in step 9 and stamp in Flirty Flamingo ink on the grid paper and all four directions.
11. Place the full flower that is 1/2" in the center of the X. Ink and stamp with Misty Moonlight ink on the grid paper and the card stock. I stamped over the center of the 1 1/4" Flirty Flamingo flower, rotated a bit so the point of the center Flirty Flamingo flower are between the rounded petals of the Misty Moonlight flower.
12. Punch the bottom center of the Flirty Flamingo layer. Adhere the stamped layer near the top of the Flirty Flamingo layer.
13. Tie the ribbon around the bottom of the card stock. If you are using Gidget's Bow Maker, position the pegs with one hole in the middle. Make the bow by wrapping the ribbon around the pegs with one side over the other. The end that is on top will go down and between the pegs, then up and over the ribbon between the pegs. Even up the ends of the ribbon, aiming for the knot to be centered between the pegs. Tie a simple knot. Slide your bow up and off the pegs.
14. Adhere the bow barely covering the bottom of the stamped layer. I used a Glue Dot to hold the bow in place. Then I wrapped the ends of the ribbon to the back and adhered with Glue Dots or Stampin' Seal.
15. Adhere Flirty Flamingo card stock centered on the Just Jade layer.
16. Add Genial Gems, as desired. They are Mint Macaron and Pale Papaya, but they are clear with gold sparkles. I think they go with this card just fine.
